What is Blockchain in your words ? *

It is a form of a technology that is really behind a list of records or blocks that prevents or clears the problem of been getting hacked or been exposed off. They are actually not in re-modifiable form and are highly secure one.

What was the need of Blockchain ? *

1. They are needed for fast, secure, and affordable transactions in the upcoming future of the citizen.
2. They are very useful for all the verification and authentication in the future.
3. Heavily useful in the side of Cloud platform as well as Cyber Security.

What is Hash do a small demo and upload the photo here ? *
